hot element

Eliminate open flames and diminish the risk of fire with VIDACASA! Unlike induction heat, VIDACASA Hot Cells are cordless and portable, making buffet presentations extremely flexible. The design is perfect for serving a variety of dishes, large or small, to any sized event.

Unique thermal engines are at the heart of the VIDACASA system, providing maximum transformation of electricity to heat. The heat energy is conducted through the flat surface of Hot Cells, ensuring food stays warm efficiently and evenly.
