## VIDACASA by PICO Inc GOING GREEN FOR A SUSTAINABLE FUTURE

PICO Inc. introduces the latest innovations in environmentally-friendly heating and cooling solutions for buffetware. The revolutionary VidaCasa line not only provides superior performance, cost savings and increased efficiency – it also presents sustainable modernized alternatives to traditional fire and ice. Embrace the future of foodservice today and witness the VidaCasa advantages for your hospitality operations... and the planet.

### H1X HOT CELL

The long-lasting Lithium Ion rechargeable H1X Hot Cell facilitates powerful heating over 500 uses with battery life of up to 3 hours per use. The reusable technology eliminates the need for ongoing replacement of fuel and the potential for hazards such as fire. Significant savings are therefore realized on storage, transportation, packaging and emissions.

**REMOVABLE BATTERY SYSTEM**  
The removable battery system allows the user to replace batteries on the fly for longer events, and keeps the Heating Plate operational longer!

**BATTERY RECHARGE DOCK**  
The easy recharge dock allows the user to recharge 6 batteries on a single plug, making recharging these units a breeze!

#### **1.6lb Battery Replaces 518lbs of Gel Fuel**

The small footprint space saving unit easily fits in standard buffetware and can be reused over 500 times.

#### **Reduced Carbon Footprint**

Low energy consumption device meets standards for food contacting materials, with no toxic chemicals.

#### **Lower Transportation Costs & Emissions.**

By reusing the same rechargeable device, repeat shipment of fuel and related emissions are alleviated.

#### **99.7% Waste Reduction Over Gel Fuel**

No more cans to dispose of, fuel spills, or soot and flames to extinguish. Enjoy clean surface heat.

#### **12 Pack of Batteries Replaces 3 Pallets of Fuel**

**Contact your Pico representative to discuss our Battery Recycling Partnership program.**

## VIDACASA by PICO Inc GOING GREEN FOR A SUSTAINABLE FUTURE

### C1 COLD CELL

Don't sweat the cold stuff... break the ice with the forward-thinking rechargeable C1 Cold Cell. Experience 8 hrs of cooling per use with the freezer recharging cold pack that maintains a temperature of -10°C / 14°F, and can be reused up to 2000 times. The sustainable alternative saves repeated buckets of ice being carried to the buffet table, and performs consistently cooler.

#### Simple Charging Solution

Recharge the Cold Cell by storing them in a home refrigerator freezer for 24 hours until they solidify for optimal usage.

#### Cordless & Long Lasting

Once charged, the Cold Cells can last up to 8 hours, while delivering a constant temperature of 14°F (-10°C).

### INSTANT HOT CATERING SOLUTIONS

Imagine a catering solution that heated food instantly, with no electricity and no flame. VidaCasa brings this vision to reality with its patented Heat Blaster technology. Simply place the Heat Blaster packet into the buffetware, add warm water in the reservoir, wait 1 minute... and watch as instant high heat steam is diffused for up to 45 minutes.

#### Safe and Sustainable

Water activated Heat Blaster packs offer a clean alternative to potentially dangerous fuel and flame solutions.

#### Reusable Buffetware

VidaCasa offers compatible buffetware that can be reused up to 20 times, for virtually waste-free components.

#### Disposable Packets

The HeatBlaster packet contains no harmful byproducts and does not produce toxic fumes. It emits water vapor, hydrogen and oxygen. Used packets are disposable in everyday trash.

### STEP BY STEP GUIDE

**1** Place One Heatblaster Pack Into each reservoir of your Full/Half Size Instant Hot Buffetware.

**2** Simply use room temperature water to fill each reservoir. This will activate high heat steam in 30 seconds to 1 minute.

**3** Place your food pans on the tray, and enjoy hot food for 45 minutes. Remove packs safely once steaming has subsided.
